Dear Mr. Thompson:

In response to your letter of 3 April 1979, concerning the definition of the area of surface disturbance of our proposed Prospector 4 project, Energy Fuels Nuclear will commit itself to a surface disturbance of less than two acres of land. We anticipate the waste disposal area to total approximately 1/3 of an acre, although it could be slightly more; but at any rate foreseeable, less than two acres.

Should this projection be exceeded, resulting in greater than two acres of disturbance, we will promptly notify your office and file the appropriate forms as required.

We appreciate your consideration in this matter with respect to classification of this project.

Thank you very much.

Very truly yours,

Steven P. Ogden  
Environmental Specialist
